

Quality Policy

It is the policy of Guardian Lock & Engineering Co Ltd to maintain on a continuous basis an effective quality management system in compliance with BS EN ISO 9001 standard, which will assure our customers that the quality of our products and the service we provide, meets or exceeds the customer's specified requirements.

The objective of the quality assurance system is to ensure that the quality of all products, whether manufactured within the company or obtained from an outside vendor, is controlled at all points to ensure the early and prompt detection of actual and potential deficiencies, trends or conditions which would lead to unsatisfactory quality and so enable the company to take corrective action which is both timely and effective.

The management of Guardian Lock & Engineering Co Ltd is firmly committed to this policy and to continually improve its quality management system through the establishment, and monitoring of performance targets in key operational areas. This policy shall also be subject to continual review as to its suitability for the company's operations.

The Systems and Procedures Manager is entrusted with overall authority and responsibility for the quality management system, and each employee is responsible for implementing the requirements of this policy within his/her area of operation. When major problems cannot be resolved within the organisation, these problems shall be brought to the attention of a Director for resolution.
